

Lab 2: Jira Kanban Project Implementation Report

Course: Software Engineering Lab 2 • Problem Statement #42: Internal Microservice Catalog & Health Portal

1. Kanban Project & Board Creation

Project: Kanban_BPS#42 | Key: KBPS42

Description: Successfully initialized a new Company-Managed Kanban Software Development space in Jira named Kanban_BPS#42 with autogenerated project key KBPS42. The board contains the standard workflow stages: *TO DO*, *IN PROGRESS*, *IN REVIEW*, and *DONE*.

2. Requirements Addition (5 FRs + 2 NFRs)

7 Requirements Modeled

Description: Added all 5 Functional Requirements (FR-001 to FR-005) and 2 Non-Functional Requirements (NFR-001, NFR-002) as discrete work items on the board. Configured appropriate priority levels (High / Medium) based on stakeholder impact.

Department of CSE, PES University • Problem Statement #42

3. Epic Creation & Task Association

Epics Linked via Parent Relationships

Description: Defined 7 comprehensive Epics corresponding to the core architectural domains. Assigned each requirement task to its respective parent Epic (e.g., *Health Monitoring & Availability*, *Service Catalog Management*, *Dependency Graph Visualization*), visible via colored Epic badges on the Kanban cards.

4. User Stories for Use Cases

List View: Epics & Nested User Stories

Description: Created user stories formatted as "As a [role], I want [goal], So that [benefit]" mapped under each Epic (e.g., KBPS42-19: Multi-Channel Downtime Alerts, KBPS42-21: Graph Rendering Optimization, KBPS42-17: Register New Microservice) with reporter Subramani B M.

Work	Assignee	Reporter	Priority	Status	Resolution	Created
KBPS42-11 Alerting & Notification System	Unassigned	Subramani B M	Medium	To Do	Unresolved	Aug 30, 2026 at 6:57
KBPS42-4 FR-004: Alerting & Notifications	Unassigned	Subramani B M	Medium	To Do	Unresolved	Aug 30, 2026 at 6:51
KBPS42-19 Multi-Channel Downtime Alerts	Unassigned	Subramani B M	High	To Do	Unresolved	Aug 30, 2026 at 7:24
KBPS42-13 Performance & Scalability	Unassigned	Subramani B M	High	To Do	Unresolved	Aug 30, 2026 at 6:58
KBPS42-6 NFR-001: Performance & Scalability	Unassigned	Subramani B M	High	To Do	Unresolved	Aug 30, 2026 at 6:52
KBPS42-21 Graph Rendering Optimization	Unassigned	Subramani B M	High	To Do	Unresolved	Aug 30, 2026 at 7:25
KBPS42-10 Dependency Graph Visualization	Unassigned	Subramani B M	High	To Do	Unresolved	Aug 30, 2026 at 6:57
KBPS42-3 FR-003: Dependency Mapping	Unassigned	Subramani B M	High	To Do	Unresolved	Aug 30, 2026 at 6:50
KBPS42-18 Interactive Dependency Graph	Unassigned	Subramani B M	High	To Do	Unresolved	Aug 30, 2026 at 7:21
KBPS42-9 Service Catalog Management	Unassigned	Subramani B M	High	To Do	Unresolved	Aug 30, 2026 at 6:56
KBPS42-2 FR-002: Catalog Management	Unassigned	Subramani B M	High	To Do	Unresolved	Aug 30, 2026 at 6:50
KBPS42-17 Register New Microservice	Unassigned	Subramani B M	High	To Do	Unresolved	Aug 30, 2026 at 7:19
KBPS42-23 Search & Filter Catalog	Unassigned	Subramani B M	High	To Do	Unresolved	Aug 30, 2026 at 7:28
KBPS42-12 API Documentation Aggregator	Unassigned	Subramani B M	Medium	To Do	Unresolved	Aug 30, 2026 at 6:58
KBPS42-5 FR-005: API Documentation	Unassigned	Subramani B M	Medium	To Do	Unresolved	Aug 30, 2026 at 6:51

5. Task & Subtask Breakdown

Detailed Work Breakdown (FR-002 / KBPS42-2)

Description: Detailed engineering work breakdown demonstrating subtask creation under FR-002: Catalog Management: KBPS42-29: Create metadata input form with validation and KBPS42-30: Implement service catalog database persistence layer.

6. Comprehensive Backlog List View

Complete Backlog Hierarchy

Description: Complete hierarchical view of the project backlog showing all 7 Epics expanded with their constituent functional requirements, user stories, priorities, and assigned workflows ready for agile delivery.
