

UML 2.5 Component Diagram — Event-Driven Microservices Architecture (Problem Statement #42)

UML 2.5 NOTATION LEGEND:

- Component Box: Modular autonomous deployable service unit encapsulating business domain logic (Half-Circle): Required Interface indicating dependency on another service.
- Ball (Lollipop): Provided Interface exposing capabilities to external callers.
- Assembly Connector: Direct ball-and-socket coupling between provided and required contracts.
- Dashed Arrow: Asynchronous event publish/subscribe or usage dependency.
- Dotted Arrow: Data persistence binding to polyglot storage layer.
