

INTERNAL MICROSERVICE CATALOG & HEALTH PORTAL

UML 2.5 Component Diagram — Event-Driven Microservices Architecture (Problem Statement #42)

Student: Subramani B M | SRN: PES1UG24CS473 | Section: H | Dept. of CSE, PES University

«system boundary» Internal Microservice Catalog & Health Portal Core Platform

UML 2.5 NOTATION LEGEND:

- Component Box: Modular autonomous deployable service unit encapsulating business domain logic.
- Socket (Half-Circle): Required Interface indicating dependency on another service.
- Ball (Lollipop): Provided Interface exposing capabilities to external callers.
- Assembly Connector: Direct ball-and-socket coupling between provided and required contracts.
- Dashed Arrow: Asynchronous event publish/subscribe or usage dependency.
- Dotted Arrow: Data persistence binding to polyglot storage layer.
